

# ADR @ 80 HERTZ

## Technical Specifications

[View ADR Stages](#)

Ideally we prepare our ADR sessions at least 24 hours before the session. This requires access to picture, dialogue/music/fx tracks, cues sheets & time to schedule a line test with the pairing studio.

We use [Edi Prompt](#) by 'Sounds in Sync' to cue talent. This provides the artist with audio beeps/pips, on screen text cues & swipes/streamers/prompts. Please provide the characters Pro Tools (.ptx file) spotting session via email if possible, or characters Edi Prompt MIDI file. Otherwise, we'll work from the cue sheets.

Please provide the session start time & frame rate with the cue sheets.

Source Connect:	Certified Studio Source Connect Pro ID: <b>80hertz</b> Audio (mics & talkback) sent on the left (chan 1) & LTC timecode sent on the right channel (chan 2). Sync via RTS available subject to a line test prior to the session. LTC sync preferred please.
